

Meeting co-organised by ERRIN ICT WG and EURO CITIES

Introducing Living-in.EU to regional authorities

Monday 15 May 2023 | 16:00-18:00

ERRIN Office at 3 rue du Luxembourg (8th Floor)

Founded in 2019, Living-In.EU aims at promoting sustainable digital transformation in cities and communities in the EU. To achieve the latter, stakeholders from all levels of government, cities, regions and Member States in the EU commit to the goals and principles of the movement by signing the Declaration on joining forces to boost sustainable digital transformation in cities and communities in the EU (Join, Boost, Sustain declaration - JBS).

To support this movement, the Go Li.EU project (coordinated by Eurocities, together with EnOLL, OASC, CEMR and ERRIN) has been selected by the European Commission. It creates a formal governance body that aligns with the principles of multilevel governance, connecting different communities that contribute to the shared mission, vision and strategy.

Living-in.EU has been successful in creating an impact through signatories and supporters. This meeting will be organised to showcase what impact the movement can have and answer potential questions about the movement, the project and the services provided to local and regional authorities.

16:00	Introduction Gabriela Ruseva, Go Li.EU Project Coordinator, Eurocities and ICT WG leader
